

3D Printing - How to Download, Install, & Register for the KISSlicer Slicing Software

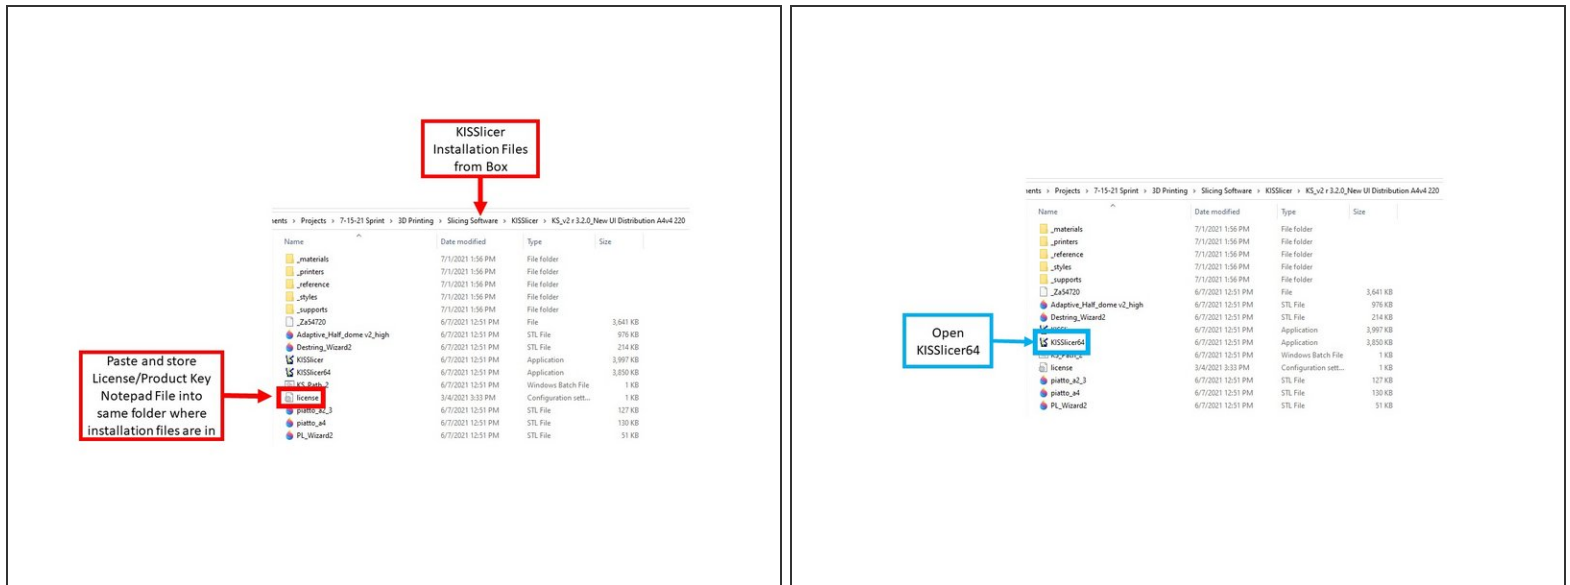

Written By: Ronaldo Diaz

INTRODUCTION

This guide details how to download, install, and register for the KISSlicer Slicing Software for the 3ntr 3D Printers.

Step 1 — 3ntr - KISSlicer

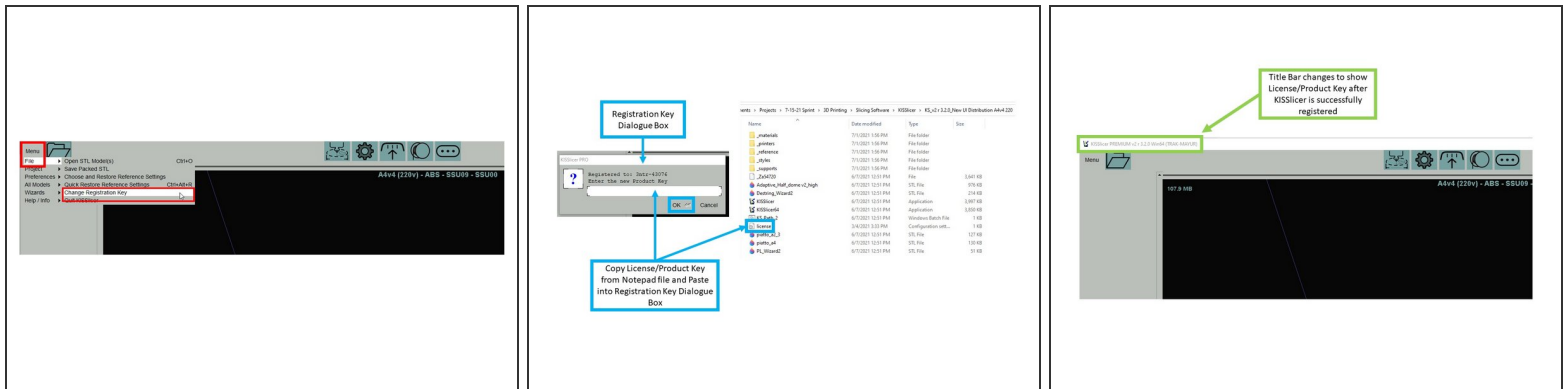

- The following section applies for downloading, installing, and registering for the KISSlicer software for 3ntr's A2v4 and A4v4 3D Printers.

⚠ You must have access to the KISSlicer License/Product Key before proceeding with the next steps.

- In order to receive the abovementioned License/Product Key, please make a request to the following email address: additivemanufacturing@trakmt.com.
- A TRAK Machine Tools Representative will make a request to Plural for the License/Product Key. With a one (1) day lead time, Plural will send our company the License/Product Key in the form of a Notepad file. Please note that Plural requires a one (1) day lead time for KIS and SSI licenses.
- In an email, a TRAK Machine Tools Representative will send the Notepad file, as well as this Dozuki procedure. This email will also include a Box site where the KISSlicer installation files can be downloaded from.
- **i** Make sure to download all applicable installation files from the Box site provided, as well as the Notepad file. All components are needed in order to install the KISSlicer program.
- Once all applicable files are downloaded into your computer, paste and store the License/Product Key Notepad file into the same folder that your KISSlicer installation files are in.
- Begin the registration process by clicking on the KISSlicer64 file. The KISSlicer program should start.

Step 2 — 3ntr - KISSlicer (continued)

- If KISSlicer program recognizes the license key, it will be automatically applied when the program opens.
- If the License/Product Key does not automatically work as stated above, manually apply it to the KISSlicer program by going to Menu, then File, then Change Registration Key.
- The Registration Key Dialogue Box will appear. Open the Product/License Key Notepad file, and copy the actual Product/License Key that is in the file. Paste the Product/License Key into the Registration Key Dialogue Box, and click "OK."
- Once KISSlicer is successfully registered, the title bar will show the License/Product Key, as shown on the image.
